- ▶ Patent-pending technology
- ▶ Customers: individuals, schools, businesses and organizations

## About Boma Systems, Incorporated

Boma Systems offers instant communications for enhanced security and productivity. New and powerful services utilize patent-pending technology, enabling anyone to easily and affordably connect with multiple people at any time, anywhere, instantly.

## Core Offerings

**Push 5 Urgent Alert System** ([www.Push5.com](http://www.Push5.com)) turns any phone into a personal urgent alert system. At one touch, *Push 5* directly connects you to your personal network of up to 12 people at cell, home and work phones and by e-mail and text (SMS) message. In one call: instantly send a silent urgent alert across multiple communication devices, broadcast your location and help request, and join trusted individuals in an on-the-spot conference call.

**Boma Instant Connect** ([www.BomaIC.com](http://www.BomaIC.com)) offers simple, affordable and easy to use group communications for personal, business and organizational use. In one call, initiate an instant conference call or broadcast a voice message to groups of up to 10 people at work, home, or cell phones and notify them by e-mail and text (SMS) message.

**Boma Instant Connect Pro** ([www.BomaICPro.com](http://www.BomaICPro.com)) provides urgent and routine blast communications and conference services for small and large groups of recipients. No new hardware or software is required. It offers cost-effective solutions for schools, businesses and organizations of any size.

## The Boma Systems Story

Boma Systems was founded with the vision of using technology to protect people from harm. *Push 5* was the company's first service and offers the fastest, surest means to get help from friends and family in an urgent event. *Push 5* was inspired by founder Ken Tam's Peace Corps experience in Africa, where a "boma" is an enclosure that protects people from outside harm.

As people became aware of *Push 5*'s powerful technology, they also wanted to use it for routine personal and business communications. This led to the launch of *Boma IC* for individuals and small groups and *Boma IC Pro*, a robust and flexible service for organizations, schools, and businesses.

Boma Systems is a privately held corporation located in California.
